SUMMARY

Cloud & DevOps Engineer with experience in **Terraform, Azure, AWS, CI/CD pipelines, and Automation**. Skilled in **Infrastructure as Code (IaC) and containerization**. Adept at designing scalable cloud solutions, optimizing infrastructure, and enforcing security compliance. Seeking to leverage skills in **DevOps, automation, and cloud infrastructure** to drive efficiency and innovation in cloud operations.

TECHNICAL SKILLS

- **Programming Language:** Python, Go
- **Scripting Languages:** bash, PowerShell
- **Version Control:** GitHub, Bitbucket, Azure Repos
- **CI/CD Tools:** Azure DevOps, Jenkins
- **Cloud Technologies:** AWS, Azure, GCP
- **Monitoring:** Dynatrace, Azure Monitor, Cloud Custodian, Scout Suite
- **Configuration Management:** Ansible
- **Containerization:** Docker
- **CRM:** Azure boards, Jira
- **Operating Systems:** Linux, Windows

WORK EXPERIENCE

Associate DevOps Engineer | TechMahindra

Sep 2019 - Nov 2020

Client: Jefferies (Investment Banking)

- Designed and developed **Terraform modules** for various Azure infrastructure components, including VMs, SQL databases, load balancers, policies, and Role-Based Access Control (RBAC).
- Collaborated with the client to understand and analyse infrastructure requirements, translating them into effective Terraform code.
- Managed and versioned **Terraform** code using **Bitbucket**, prioritizing proper documentation and committing with clear messages to enhance transparency and foster collaboration.
- Utilized Terraform to deploy and manage Azure infrastructure, ensuring uniformity and reproducibility across different environments.

Client: State Bank of India (SBI) - Banking

- Administered and optimized **Linux-based systems**, ensuring 99.9% uptime and implementing security protocols that safeguarded against potential threats.
- Proactively monitored server performance and system health using **Dynatrace**, identifying and resolving critical issues before they impacted business operations.
- Managed user accounts, permissions, and network access controls, enforcing strict security policies that reduced unauthorized access incidents by 25%.
- Led regular system updates and patches, ensuring systems remained secure and compliant, effectively mitigating vulnerabilities and minimizing security risks.

Junior Cloud Infra Engineer | BrainScale INC

Aug 2018 – Dec 2020

Client: Element Analytics

- Developed **Python-based connectors** for seamless integration between client UIs and Azure/AWS, improving data exchange efficiency by **25%**.

- Automated workflows using **AWS Lambda & Azure Functions**, streamlining operations and reducing manual intervention.
- Designed and deployed serverless architectures using **CloudFormation & ARM Templates**, ensuring scalability and cost efficiency.
- Integrated Python connectors into **GitHub repositories**, enhancing version control.
- Provided ongoing technical support, resolving issues efficiently to maintain service continuity across cross-functional teams.

Client: Party Plan Solutions

- Designed and implemented a **hub-spoke architecture** for a secure and scalable 3-tier application in **Azure**.
- Led policy creation workshops, delivering documentation and live demos for seamless adoption.
- Developed cost estimates using **Azure Price Calculator**, providing clients with optimized budget planning.

Associate DevOps Engineer | JiBe Development Services Pvt Ltd

Sep 2019 - Nov 2020

Client: Internal

- Designed and maintained **CI/CD pipelines** using **Azure DevOps** for Angular applications and Node APIs.
- Configured and managed **multi-environment deployments** (Dev, QA, Staging, Prod) to streamline releases.
- Optimized **self-hosted build agents**, improving build and release performance.
- Utilized **Azure Repos** for version control, implementing effective branching strategies.
- Oversaw **build and release processes**, ensuring seamless collaboration between development and testing teams.
- Developed and documented **rollback procedures** to mitigate deployment risks and minimize downtime.

PROJECTS

Docker Website with Go

- Built a lightweight, containerized web application using Go and Docker to ensure portability and ease of deployment.
- Implemented a CI/CD pipeline for automated testing and deployment, improving efficiency and reducing manual intervention. [GitHub Repository](#)

Cloud Security Compliance Tool

- Designing a tool to automate cloud security assessments and generate compliance reports based on industry standards.
- Integrated policy-based scanning to detect security misconfigurations and provide remediation suggestions.

EDUCATION

Loyalist College in Toronto, ON, CA

| Postgraduate in Cloud Computing

2023 - 2025

C-DAC (SM Vita,) Mumbai, India

| PG-Diploma in Big Data Analytics

2019

University of Mumbai (PVPP College), India

| Bachelor of Engineering (Electronics)

2013 - 2017

CERTIFICATES

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Certified: Azure Administrator Associate (AZ-104)
